Included for everyone

- Courses scheduled without clashes
- Invitations, sign-in sheets, certificates
- One record per person, rights by role
- Portals on computer and phone
- Rooms, equipment and consumables
- End-of-course and follow-up evaluations
- Reports and Excel exports
- GDPR and Swiss FADP kept by the server
- Data hosted in Europe
- Built-in help in three languages

The same tool for simulation centers, nursing schools, universities and training providers.

Built by an educator, for educators

Cursus Connect is designed and operated by Life Support Distribution, a partner to simulation centers in France, Switzerland, Belgium and Luxembourg.

It was born in the field, conceived by a nurse educator, with one simple rule: what the screen shows is true. An email shown as sent has gone out; a ticked attendance box is never presented as a signature.

Book a demo

Online, with your courses, your OSCEs and your documents. Scan the code or write to us.

Cursus Connect

Fewer spreadsheets. More time to teach.

Software for healthcare simulation centers and training institutes. Courses, simulation, OSCEs, portals, documents, compliance.

What changes day to day

The schedule lives in three spreadsheets that contradict each other.

→ **One schedule. Room and instructor clashes are flagged in time.**

Invitations go out one by one, replies get lost.

→ **An email to every enrollee, in one go. The reply arrives on their portal.**

Simulated patients are recruited by phone the day before.

→ **They reply from their portal. Their compensation is calculated for you.**

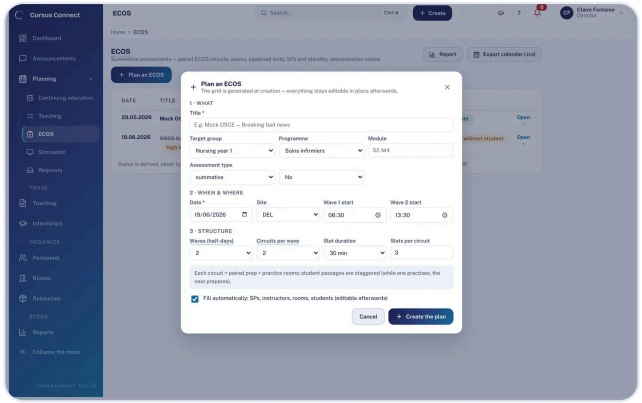

Certificates are typed in Word, one at a time.

→ **Numbered, locked, sent by the server, found again on the portal.**

The quality audit is prepared in a rush.

→ **Evidence builds up as you go, in PDF and Excel.**

A module for every job

Planning an OSCE: rounds, circuits, stations and simulated patients.

Courses
Schedule, invitations, sign-in, review.

OSCE
Rounds, circuits, grids, scores.

People
Records, rights by role, certifications.

Reports
Indicators, Excel exports, statistics.

Simulation
Sessions, simulated patients, compensation.

Teaching
Curricula, cohorts, attendance, internships.

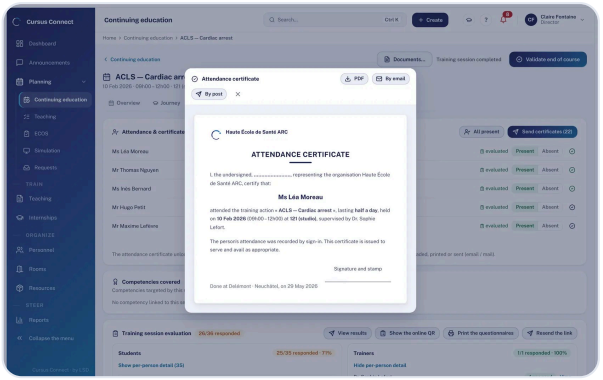

Rooms and equipment
Capacity, maintenance, consumables, lots.

Quality and GDPR
Qualiopi, eduQua, registers, audit log.

The core is included for everyone. The Simulation, Teaching, Invoicing and Quality packages are switched on whenever you want, with nothing to install.

Documents that hold up

End-of-course documents are produced by the server, numbered and locked. Once issued, they no longer change.

Attendance certificate in the center's name, sent by email or by post.

Numbered and locked
Certificates and diplomas numbered by center, type and year.

In your center's name
Header, contact details and signature of the center on every document.

Sent and easy to find
The PDF goes out by email and stays on the learner's portal and in the register.

2× a day
backup of every center

1× a week
full restore, tested

35 days
of off-site archive, locked

Europe
data hosted with OVHcloud
