Cursus Connect

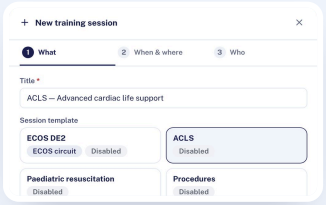

Fewer spreadsheets. More time to teach.

Courses, simulation, OSCEs, documents, compliance: everything your center manages today in spreadsheets and emails, brought together in one tool. Nothing to install, help on every screen.

- Nothing to install
- Data hosted in Europe
- English, French, German

One course, from planning to certificate

1 Plan

The assistant creates the course: program, room, instructor, equipment. Clashes are flagged.

2 Invite

One click, and every enrollee receives their invitation by email. You see who has replied.

3 Sign in

The attendance sheet is ready, in your center's name: print it and sign.

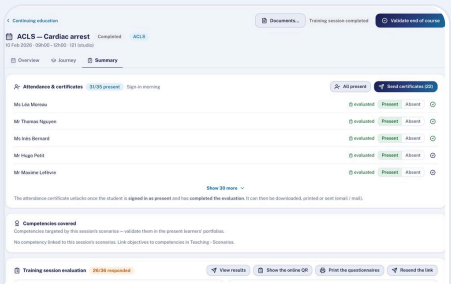

4 Certify

The attendance certificate is numbered, locked, and goes out by email or by post.

www.cursusconnect.com

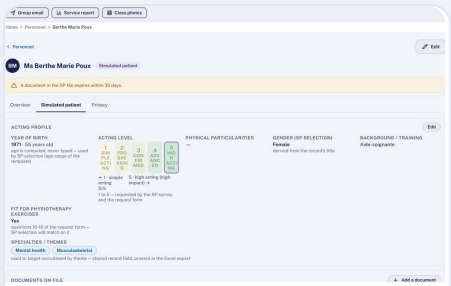

A module for every job

You turn on the modules you need; the rest disappears from the screen. The core is included; packages are added whenever you want.

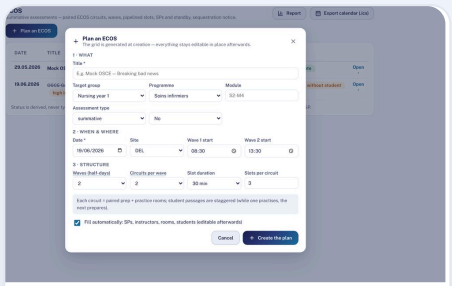

Courses

Schedule, invitations, review

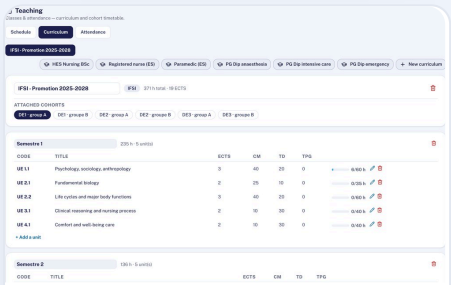

Simulation

Simulated patients and sessions

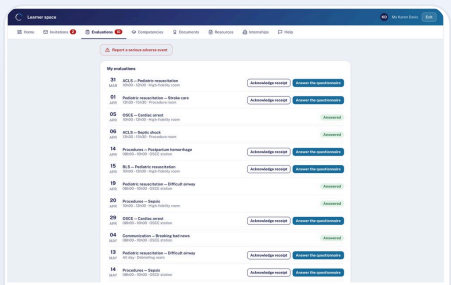

OSCE

Rounds, circuits, grids, scores

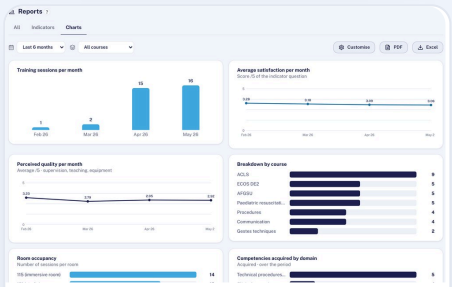

Teaching

Cohorts, curricula, internships

Portals

Learners, instructors, SPs

Reports

Indicators, exports, statistics

And also: rooms and equipment, invoicing, Qualiopi and eduQua, GDPR and Swiss FADP.

For every type of institution

Simulation center

Sessions, OSCEs and equipment: all ready on time.

Modules: core, Simulation

Nursing school

Every cohort is followed, from classes to internships.

Modules: core, Teaching, Simulation

University

Large-scale exams, structured and documented.

Modules: core, Simulation, Teaching

Training provider

Sessions invited, signed in, evaluated, invoiced.

Modules: core, Invoicing, Quality

Your data, kept safe

2
isolation checks between centers, on every request

2× a day
backup of every center

1× a week
full restore, tested for real

Europe
data hosted with OVHcloud
